UNIVERSITY of WESTERN STATES  
*Integrating Health and Science*

## CHIROPRACTIC HERITAGE

While steeped in the history and tradition of the chiropractic profession, the University of Western States' doctor of chiropractic program is advancing the practice of chiropractic by emphasizing the use of contemporary, evidence-based methods of inquiry, analysis and treatment. As the evidence evolves, the curriculum evolves.

This modern-day approach uses the best available external evidence from systematic research, combines it with the doctor's clinical experience, and considers each patient's unique values and expectations for their health care.

# About the **University of Western States**

A leader in the education of health care professionals, the University of Western States (UWS) provides a science-driven curriculum that delivers a solid foundation and competitive edge in preparing students for clinical practice. UWS is a regionally accredited, non-profit institution dedicated to improving the health of society through its educational programs, research and clinical services.

Founded in 1904, the university offers a doctor of chiropractic degree program; master's degrees in exercise and sports science, human nutrition and functional medicine, and diagnostic imaging; a massage therapy certification program; and accredited continuing education programs for licensed health care professionals.

UWS is a founding member of the Oregon Collaborative for Integrative Medicine, an organization that aims to advance integrative health care through education, research, patient care and advocacy.
